

How Clean is the Water in the Last Green Valley?

The Quinebaug-Shetucket Heritage Corridor Water Quality Monitoring Program is seeking volunteers age 14 and older to participate in a water quality monitoring program.

In just 3 hours, you can learn the Rapid Bioassessment for Volunteers (RBV) method for water quality monitoring.

- **Certain aquatic insects are excellent indicators of water quality**
- **Wade in streams with provided nets**
- **Sort your catch using a simple guide**
- **Learn more about your local water resources**
- **Join others with similar interests in natural resource protection**
- **Data collecting is done in the fall at your convenience**

Register for this free indoor/outdoor/in-stream training session.

**Saturday, September 13, 2008
9AM - noon
Ashford Town Hall
Town Hall Road (just off of Route 44)
Ashford, CT**

Please call Jean Pillo, QSHC Water Quality Monitoring Program Coordinator at (860) 928-4948 to register or to learn more about the RBV program.
